Optimize Resources in Expensive Real Estate

In most organizations, meeting rooms in existing reservation system usually appear to be fully booked, but in reality, these precious resources may not be in-used. Consequently, as rooms are hard to reserve, users compound the problem by reserving rooms in advance just to secure the precious resource for meetings, even though the meetings are not yet confirmed. Such meetings may eventually be cancelled and they remain in the system as booked. Consequently, it is difficult for staff to organize ad-hoc meetings as all resources appear to be fully booked in the reservation system.

As real estate prices continue to rise, it is expensive to provide a desk for every staff especially when not all the employees are in the office at the same time; or not in the office for long periods at a time. In most offices with mobile workers, the personal office space would often be vacant, consuming precious real estate space and resources. For such environment, hot desking is the preferred option to optimize the precious space by having a single physical work station shared with multiple employees over different time periods in a day. Today, most companies who adopted hot desking, lack tools to help staff find a desk. Consequently, the benefit of hot desking is diminished as staff waste time walking all over the building just to hunt for a seat.

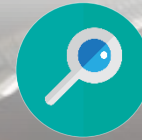

High Cost

Real Estate Cost is on the rise. Expensive to keep adding rooms and desks

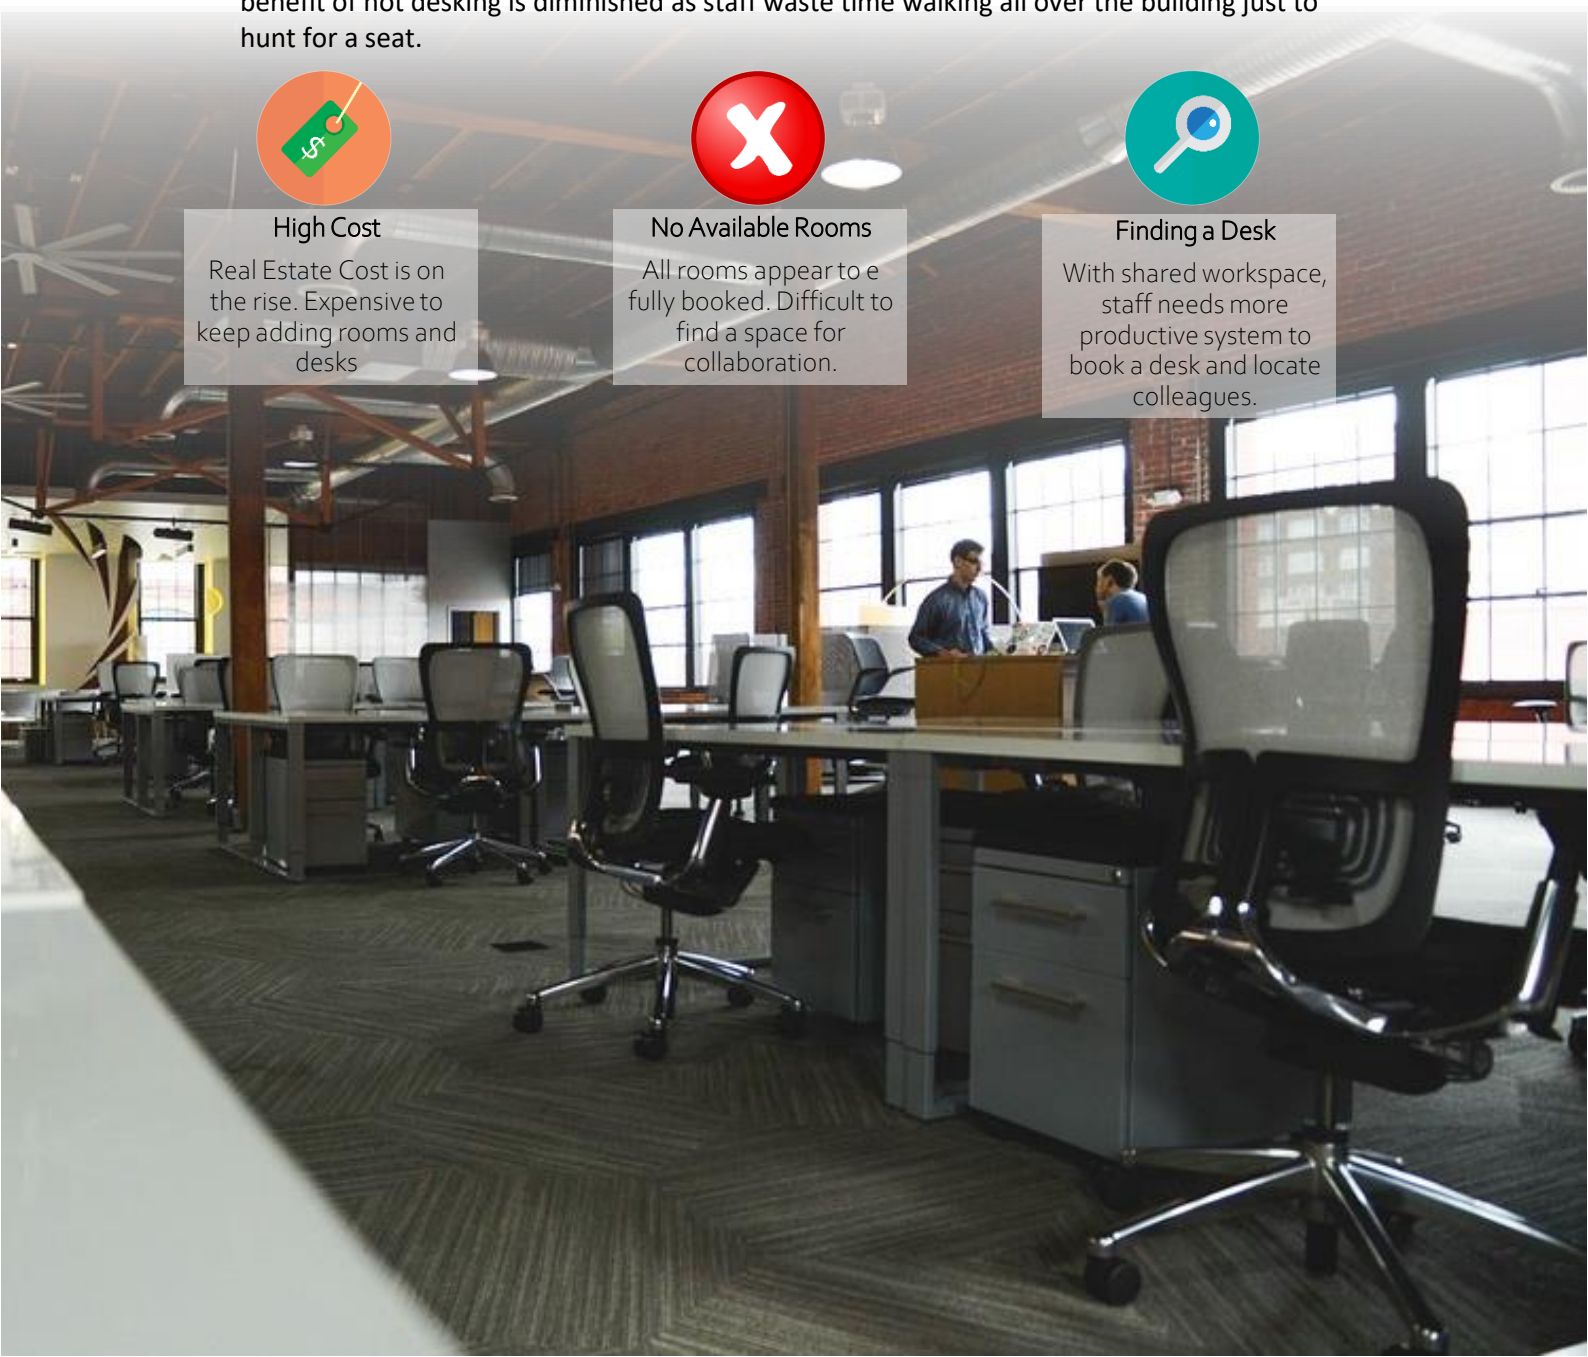

No Available Rooms

All rooms appear to be fully booked. Difficult to find a space for collaboration.

Finding a Desk

With shared workspace, staff needs more productive system to book a desk and locate colleagues.

SMARTRoom on Any Device, Any Time, Anywhere

NexLabs SMARTRoom enables staff to find and reserve a meeting room, huddle room, or a collaborative desk easily from any devices, such as PC, mobile phones and interactive kiosks, anytime, anywhere. SMARTRoom also integrates with Microsoft Outlook/O365, Google Calendar and Lotus Notes, thus allowing staff to book a meeting room directly from calendar in email apps.

SMARTRoom Touch10 Panels outside Meeting Room

SMARTRoom Touch10 are 10" all-in-one interactive panels mounted outside a meeting room. The panels are available in black or white color, and have unbeatable features such as Wall/Glass mounting kit, POE, built in Mifare/HID card support, LED light indicators, Audio feedback....etc. Staff tap their employee pass or enter a numeric pin to confirm, cancel or extend a meeting from SMARTRoom Touch10 panels.

Slim Chassis

Less than 3cm when installed on a partition or glass wall.

POE

Support IEEE 802.at/af power over ethernet

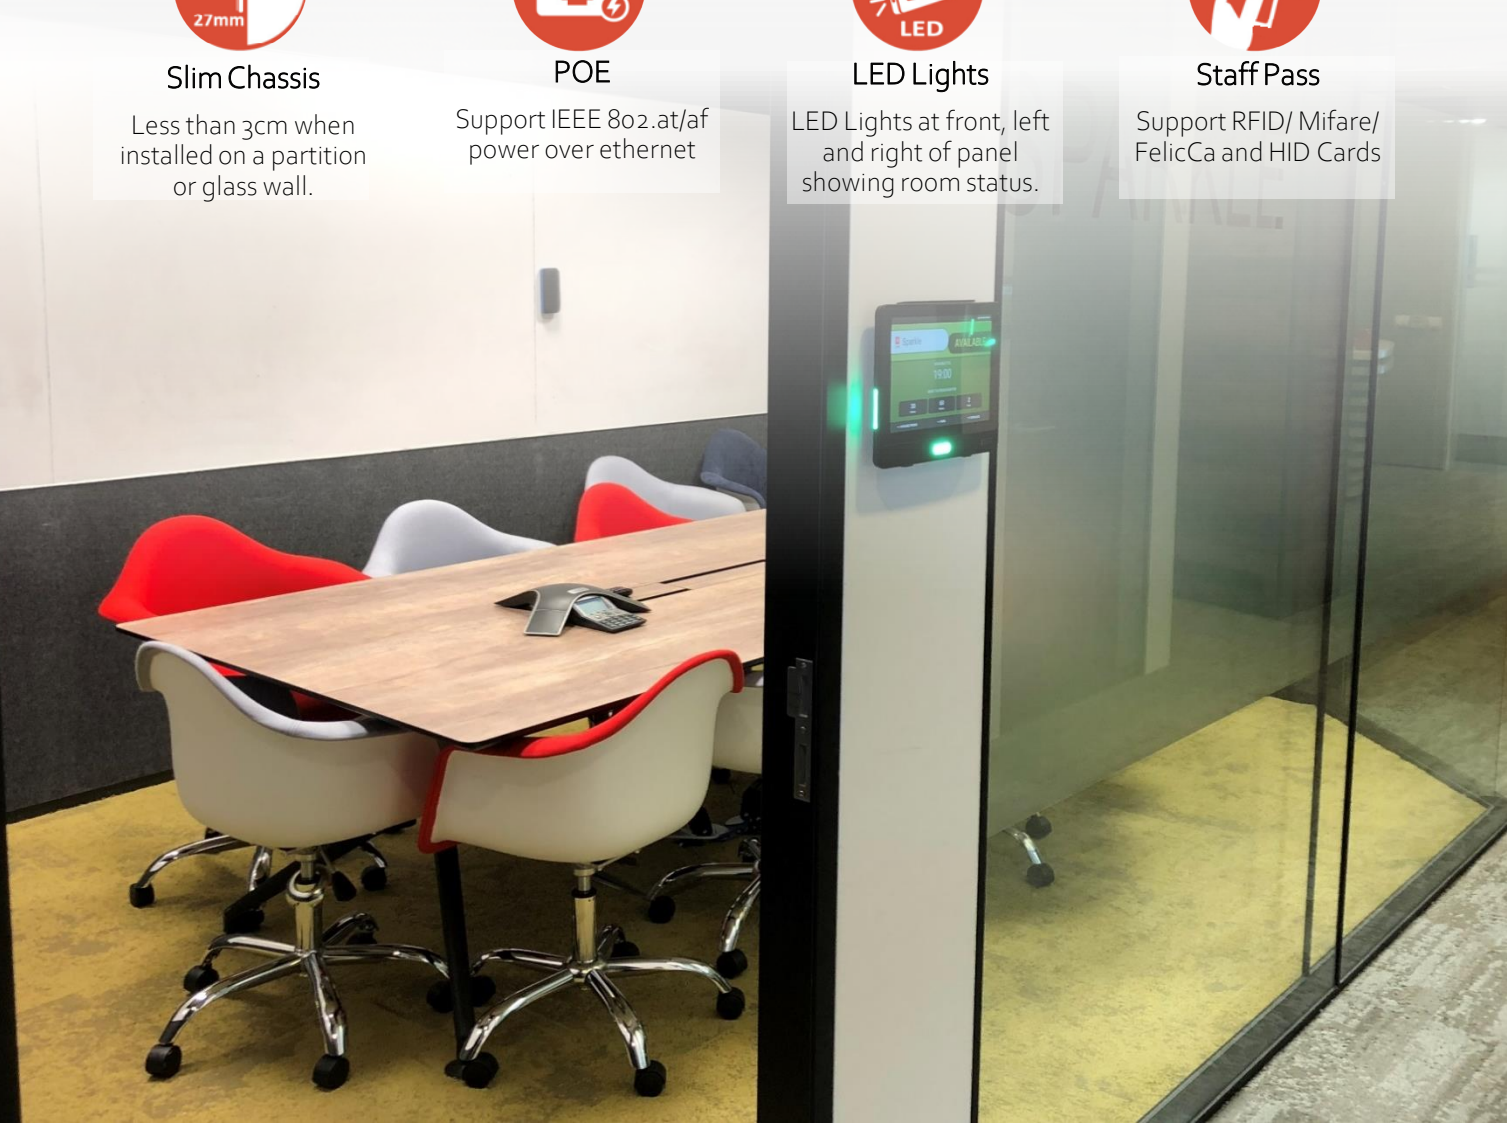

LED Lights

LED Lights at front, left and right of panel showing room status.

Staff Pass

Support RFID/ Mifare/ FelicCa and HID Cards

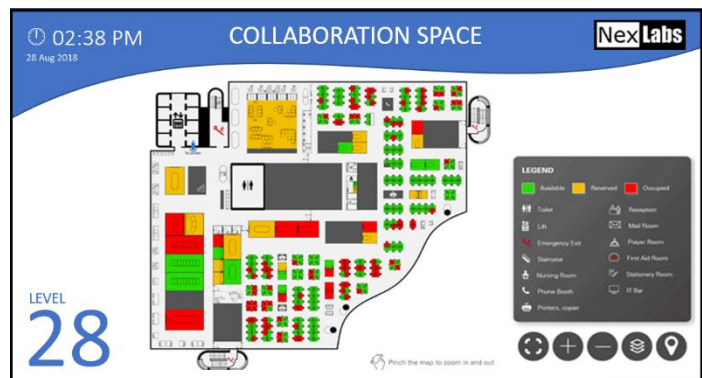

SMARTRoom Touch3 Panels for Collaboration Space

The modern workspace is designed to optimize limited resources and to facilitate collaboration. Popular spaces found in new offices are open shared desks, collaboration spaces and phone booths.

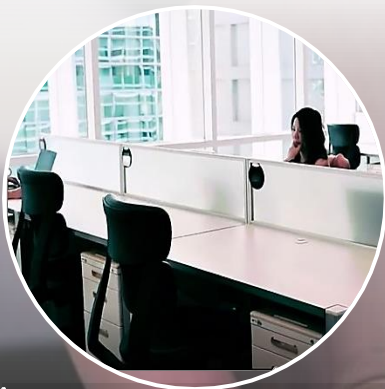

Hot Desking relies on the assumption that a predictable proportion of people are going to be away from their desks at any given time. If staff wants to ensure that he has a desk to work on when he arrives in office, he can reserve his favorite seat from SMARTRoom in advance from home with a web browser. In the office, SMARTRoom Kiosk will allow a staff to find and reserve a seat quickly without using his personal PC or mobile device. SMARTRoom Touch3 Panels (3.5" LCD) also be mounted on shared desks so that staff can go directly to a desk, tap his staff card to book. The utilization of all the different spaces can be displayed in real time on a large screen monitor at the front of the office.

Live Status on large TV screen

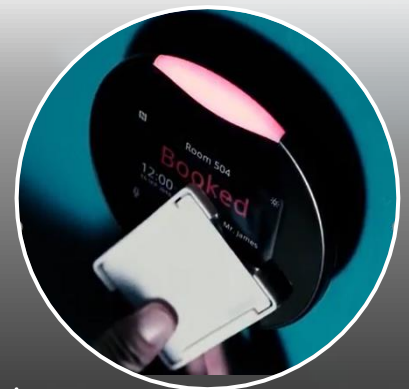

Hot Desking

Touch3 Panel Mounted on Desk Top or Desk Divider

Collaborative Space

Touch3 Panel Mounted on Table Top for Open Discussion Spaces

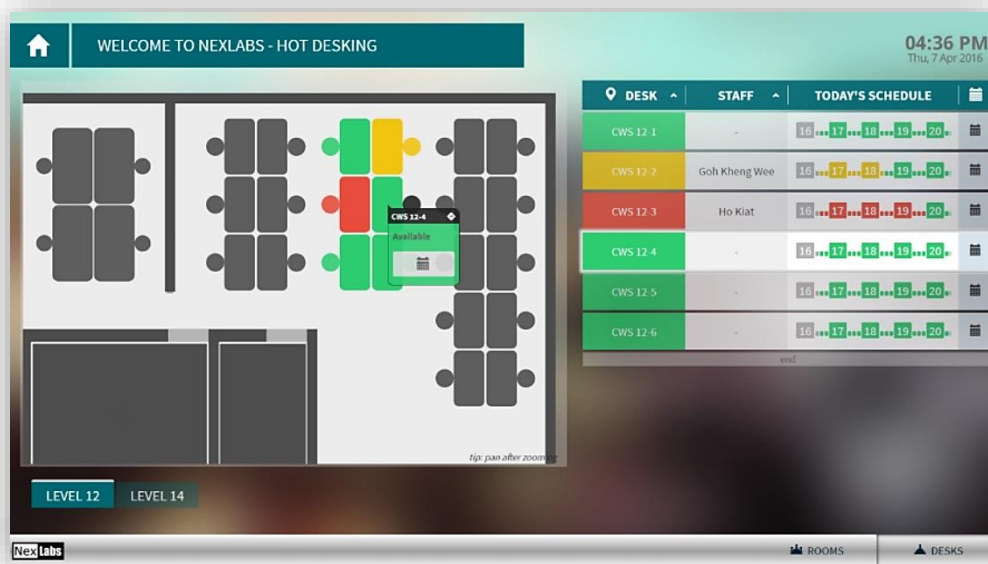

Phone Booth

Touch3 Panel Mounted on Wall to enforce Fair-Use policies

SMARTRoom Kiosk

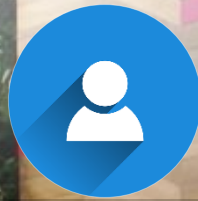

SMARTRoom Kiosk software provides an interactive map of the office space so that staff can locate and book the meeting room, collaborative space or shared desk with a staff card. The hardware can be a metallic kiosk structure or a touch screen 32" LCD panel mounted on the wall. Usually the hardware is located at the main office lobby or at the entrance of the office at every floor so that it is easy for staff to access when they first enter office.

SMARTRoom Kiosk also provides Staff Finder and Way Finder functionalities. At the start of the day, a staff can search for his co-worker and book a seat near-by to facilitate project discussion. If the staff is new, the wayfinding feature will dynamically plot the shortest path to each location from the kiosk.

Book It

Reserve Desk, Room or any Collab Space

Staff Finder

Find your colleague in office

Way Finder

Provide the shortest path to the destination

Digital Content Management

SMARTRoom displays live room status information on large LCD TV. These TVs are most commonly placed at the lobby or at the waiting area so that users and visitors can easily view status and events of each room along with other corporate content. With the LCD monitor at strategic locations, staff who needs to conduct ad-hoc meetings will know which resource is available at a glance.

SMARTRoom Screen Designer module is a comprehensive digital signage system. The web-based screen designer enables administrator to design and schedule digital content for display on the screen. The screen designer software can easily segment a large screen into multiple zones showing different content. It can also be used to create a playlist of corporate videos and images.

The image shows a large digital display screen in a modern office lobby. The screen is divided into several sections:
